Environmental, Health, Safety & Security (EHS&S) Policy

Modern Transportation is committed to providing a safe and healthy work environment. Our core values dictate that nothing we do is worth hurting ourselves or others. Therefore, it is our goal to continually recognize and control risk, to promote the health and safety of our team members, and to protect every aspect of the environment.

To achieve this mission, we are committed to:

- Establishing relevant EHS&S goals that drive continual improvement in our safety and security performance.
- Regularly reviewing our progress, continually executing the necessary actions required to surpass our EHS&S goals.
- Developing and promoting a safe and secure work environment by providing information, instruction, training, and supervision, while setting the expectation that all team members are responsible for actively and diligently maintaining it.
- Regularly and actively seeking the insight of all stakeholders on relevant issues relating to EHS&S.
- Promoting transparent communication with stakeholders regarding EHS&S policies, procedures, and performance.
- Continually improving and periodically reviewing our performance, policies and procedures by using a process safety management approach.
- Complying with all applicable EHS&S regulations, laws, and standards of performance.
- In addition, Modern's hazardous division is committed to the Responsible Care Guiding Principles.

Our EHS&S and Responsible Care Program success relies upon the active participation, cooperation, and commitment of every team member, as it relates to strict policy adherence and focus on continual improvement in our daily operation.

Patrick Cozzens
